ROWIDA ESSAM ANWER

Software Development Student | Junior Software Tester

Minya, Egypt | Phone: 01153363466 | Email: essamrowida326@gmail.com | LinkedIn: linkedin.com/in/rowida-essam-721b91200

CAREER OBJECTIVE

Motivated Software Development student seeking an entry-level Software Testing or Software Development role. Skilled in Java, software testing fundamentals, ESP32/Arduino hardware integration, and IoT architectures. Passionate about delivering reliable technical solutions and optimized embedded applications through rigorous testing and quality verification.

EDUCATION

University of Minya — Minya, Egypt Expected Graduation: 2027

Bachelor's Degree, College of Education — STEM Mathematics Track

TECHNICAL SKILLS

- **Software Testing:** Software Testing Fundamentals, Test Case Creation, Bug Tracking
- **Programming Languages:** Java
- **Hardware & IoT:** ESP32, Arduino, ESP32-CAM, GPS (Neo-6M), Ultrasonic & Gas Sensors, Actuators
- **Development Tools:** IntelliJ IDEA, Arduino IDE
- **Data & Engineering:** Basic Machine Learning, Data Analysis, Technical Documentation

PROJECTS

Solar-Powered Smart Hydroponic System

- Engineered a smart IoT hydroponic monitoring and control system utilizing ESP32, environmental sensors, and a water pump.
- Integrated solar-power management and built an interactive IoT dashboard to achieve energy and water usage efficiency.

Smart Glasses for Visually Impaired People

- Developed a wearable assistive device prototype integrating ESP32-CAM, GPS Neo-6M, and ultrasonic distance sensors.
- Connected hardware components to an IoT mobile app to enable real-time distance detection and location tracking.

Classroom Gas Monitoring System

- Built an ESP32 embedded monitoring system using safety gas sensors and servo motor actuators.
- Programmed automated real-time thresholds to detect unsafe gas exposure and trigger physical safety responses.

TRAINING & CERTIFICATES

Digital Egypt Pioneers Initiative (DEPI) 2026

Software Testing / Software Development Track

Ministry of Communications and Information Technology (MCIT)

Technical Training Program

EXPERIENCE & ACTIVITIES

Learning Assistant (LA)

- Communicated complex mathematical and technical concepts to junior students through structured tutorials.
- Mentored students during practical sessions, improving academic comprehension and problem-solving skills.

Academic & Team Projects

- Led project documentation, technical presentations, and cross-functional team collaborations for STEM engineering assignments.

SOFT SKILLS

Problem Solving, Team Collaboration, Technical Communication, Presentation Skills, Adaptability, Time Management

LANGUAGES

Arabic: Native | **English:** Good (Professional Working Knowledge)
